Adjustment of pricing **June 2021**

Dear business partner,
we would have liked to delay it a little longer, but the cost increases of the last few years and especially the skyrocketing prices of raw materials in the past six months, such as plastics, copper, brass, steel, aluminum, etc. force us to adjust the prices for our products.

Our new adjusted prices will be applied starting from June 1st, 2021. All orders received before that date will still be processed with our current pricing.

As we did 3 years ago, when we had the last adjustment of our pricing, we will not generally increase all prices by a certain percentage, but adjust prices for all articles individually as necessary.

For most torches the price adjustment will remain below the actual additional costs, as we will take the optimization of the internal production processes into account.
Unfortunately there are also some torches, on which the raw materials make up to 90% of the product-price, e.g. gas-cooled MIG/MAG torches types 15,25,24 and 36. As the sales price of these torches is almost completely based on the raw materials, we have to fully take the increased costs for these materials into account and adjust the prices accordingly. We are well aware that some of our competitors offer these models at lower prices, but please take into account that our torches are manufactured for highest quality expectations with an above average amount of material and that we only use best, solid materials that have been tested for outstanding durability.

The new, revised documents (general catalog and the illustrated price lists) will now be created as quickly as possible. An Excel file with the prices valid from June 2021 is already available on our website.

We wish you and your entire team good health and despite the pandemic a good and successful business year 2021. We would like to thank you for the trust you have placed in our products and are looking forward to continuing our service to you with our short delivery times, new and innovative products, custom designs and marketing assistance.
We will continue to produce only products of the highest quality **"Made in Germany"**.
